Poster ID	Author	Title	Abstract
150	Alberto Valdés	EVALUATION OF IN VITRO AND IN VIVO NEUROPROTECTIVE POTENTIAL OF A SUPERCRITICAL EXTRACT FROM DUNALIELLA SALINA MICROALGAE	<p>Alzheimer's disease (AD) is the most common type of dementia and the most common neurodegenerative d...</p> <p>Read More</p>
152	Ryan Duruisseau-Kuntz	Comparative lipidomic profiling of dairy milks and plant-based milks using LC-MS	<p>The prevalence of plant-based diets has steadily increased in recent years. For many reasons includi...</p> <p>Read More</p>
153	Ali Yilmaz	Mild and severe traumatic brain injury longitudinally profiled using high-resolution metabolomics.	<p>Background: Traumatic brain injury (TBI) is a major cause of mortality and disability worldwide, particularly among individuals under the age of 45. It is a complex, and heterogeneous disease with a multifaceted pathophysiology that remains unknown.</p>
